DESCRIPTION

The 174 extensometer is a sensor used for safety applications in lifting devices.

This product is used widely in many lifting machines, telescopic loaders and any other moment sensitive lifting device.

The 174 extensometer is a strain gage based sensor. It can be supplied with analog or digital output.

The digital version is supplied widely as set together with the model LMI521 display.

The 174 extensometer is usually installed on the rear side of the device and it measures the load decrease on the rear shaft.
